DETAILS

The SA5300 delivers superior quality and high speed inkjet addressing with graphics and spot color capability. Offering up to 3" of print with 6 print quality options from draft light to executive, the SA5300 provides users with configurable warn-ings on low ink levels to maintain print quality standards. Simple to set up and run, this desktop system provides profes-sional results for in-house addressing operations.

1. Quality Feeder
Its fully integrated feeder handles up to 750 #10 envelopes. Media accepted includes postcards, self mailers, flats, book-lets, as well as coated stock. Synchronized speed and prod-uct sensors maximize productivity and performance.

2. Print Engine
3" of print using (2) 1-1/2" printheads. Quick printhead align-ment and precise position produces accurate placement of text and graphics. Light mode feature improves savings with lower ink cartridge use. Print module flips up for easy access to printhead.

3. Printer Controls
Control panel software monitors printer status and controls printer from the host PC so an operator can perform remote diagnostics and multi-task while running a job. Easy to read LCD display for non-PC control.

4. Media Control
Accommodates media up to 1/2" thick. Media control rollers on the transport deck guide media as it travels through the print path. Precise registration for smaller mail pieces. In addition, the paper exit sensor detects misfeeds, increasing uptime.

5. Optional Components
The SA5300 can be aligned with a TCD 72 conveyor/dryer for extended drying time, optimum performance and profes-sional results. Neatly stacked mail improves handling on high volume runs.

Utilizing the external graphics capabilities of the SA5300 helps get your mail noticed and read!

* We are ready to print the Intelligent Mail Barcode when you are. Envelope is a sample only and does not indicate exact proportions and placement of items being printed.
